

Factory Profile And Capability

Dongguan Beiside Electronics Co., Ltd · Houjie Town, Dongguan, Guangdong, China

Dongguan Beiside Electronics Co., Ltd is located in Dongguan City, Guangdong Province. We mainly supply massage products, including neck massagers, eye massagers, head massagers, foot massagers, massage pillows, leg massagers and hand massagers.

Many of our products carry CE, RoHS, KC and FCC certificates. We have also passed ISO 9001 international quality management system certification and the BSCI factory audit.

The company was founded by a team of innovative and seasoned engineers with ten years of experience in the massage field. We excel in the management and control of quality and production, and beyond the product itself we support customers with product design.

We are constantly committed to the development of health massage products used by office workers, families, drivers and beauty salons. With a strong R&D; team and a strict quality control system we are capable of all ODM and OEM projects, with cost-effective products and attentive service.

Our quality management system is designed to supply engineering excellence and products that are good in class to meet our clients' expectations. Every product receives 100% inspection before shipping. Since establishment we have been committed to creating value for customers with unique, advanced and affordable massage products, which has won us praise from customers across the globe.

Inside The Plant

The Bisd plant in Houjie Town, Dongguan

Assembly line with fixtures staged at each station

Control board soldering before boards enter a housing

Line staff in Bisd uniform assembling handheld units

Aging rack running units to catch early failures

Bench testing against the function specification

Sewing station for the fabric parts of wraps and straps

Cartons sealed and labelled after full inspection

Finished goods staged in the warehouse

Quality Control Route

1. Incoming Material Check

Cells, motors, films and fabrics are checked before they reach the line.

2. In Line Inspection

Soldering, assembly and function are checked at each station along the six production lines.

3. Aging And Function Test

Units run on aging racks and are checked for heating, vibration, airbag and pulse function.

4. Full Inspection Before Packing

Every unit is inspected before it is packed. This is not a sampling step.

5. Packing And Carton Check

Accessories, manuals, labels and carton marks are verified against the order sheet.
