

SIZE CHART

HDPE Round Bale Net Wrap

TSPLAS bale net wrap is a 100 percent virgin HDPE net for round balers, produced in widths from 48 inch to 67 inch with guaranteed roll length and tensile strength above 2800 N. It has been exported to the United States, Canada, Australia and Ireland in volume since 2007.

Specification

Material	100 percent virgin HDPE
Widths	48 in to 67 in, other widths to order
48 in sizes	48 x 9840, 48 x 11800 and other lengths
51 in sizes	51 x 9840, 51 x 11800 and other lengths
64 in sizes	64 x 7000, 64 x 8000, 64 x 9000 and other lengths
67 in sizes	67 x 7000, 67 x 8000, 67 x 9000 and other lengths
Tensile strength	Guaranteed above 2800 N
UV protection	High UV stability
Packing	Weatherproof bag sealed at both ends
Baler compatibility	All makes of round balers

Technical Features

- 100 percent virgin HDPE, not regrind
- High UV stability for extended outdoor exposure
- Improved tear resistance under chamber tension
- Roll end marking and directional roll side marking

- Smooth lay flat bale surface on release

Materials And Process

Materials: 100 percent virgin high density polyethylene; UV stabiliser package

Process: HDPE extrusion → Knitting to width → Length controlled winding → Roll end and side marking →

Weatherproof bagging and palletising

Quality Control

- Roll length measured at winding against the guaranteed figure
- Tensile testing against the 2800 N specification
- Width checked against the 48 to 67 inch range
- Bag seal integrity checked before palletising

Application And Use

- Round baling of hay, straw and silage
- Contract baling across many farms in a short weather window
- Outdoor bale stacks held through an entire winter
- Bales handled and transported repeatedly before feeding

Use Guide

- Load the roll following the directional roll side marking
- Set chamber tension for the crop rather than running one setting all season
- Check the roll end marking when the warning band appears and change the roll at a headland
- Keep opened rolls in their weatherproof bag between days
- Stack finished bales on a free draining site so full coverage can do its job

Customisation

- Any width produced to your baler specification
- Roll length set to your preferred bale count
- Colour edge marking on request

Frequently Asked Questions

Does the net fit my baler?

It is produced for all makes of round balers in widths from 48 inch to 67 inch, and other widths are made to order.

Is the stated roll length the real length?

Yes. Guaranteed length is part of the specification, and every roll carries roll end marking so the operator knows when it is finishing.

How strong is the net?

Tensile strength is guaranteed above 2800 N, which covers dense silage and straw bales.

Can it be used on silage bales?

Yes, it is suitable for all crops under all conditions and is regularly used on silage bales before wrapping film is applied.

How quickly can you produce an order?

Production is within 20 days, depending on the production plan at the time of order.

Which markets do you already supply?

Net wrap has been exported in large quantity to the United States, Canada, Australia and Ireland since 2007.

Ordering Terms

Minimum order quantity	None on any product line
Lead time	Within 20 days, subject to the production plan

Payment terms	30 percent down payment, balance before shipment
Quality guarantee	We carry the responsibility and expenses arising from a quality problem
