

CR-2 is an electric household composter for small-scale waste generators - homes, coffee shops, schools and offices. It treats 2 to 2.5 kg of organic food waste in 2 to 9 hours through a drying, grinding and cooling sequence that reduces the weight and volume of the load by up to 90%. An oversized activated carbon filter handles odour, and an LCD display shows filter life, power consumption and cycle progress so the unit is never a black box on the counter.

Technical data

Product Name	CR-2 Household Composter
Processing Mode	Intelligent / Fermentation / Self Cleaning
Power Supply	120V, 60Hz, 500W
Capacity	4.5 Liters
Filter	Activated Carbon
Processing Time	2-9 Hours
Waste Volume Reduction	80-90%
Noise Level	■49db
Dimension	L356mm*W315mm*H365mm
Item Weight	9.77KG
Loading QTY	20GP: Around 425PCs 40GP: Around 855PCs 40HQ: Around 1,026 Pcs
