

CR-3000 processes three tonnes of organic waste a day at 50 kW on a 380 V three-phase supply. The 4800 kg frame measures 4740 x 3390 x 2470 mm and runs the same microbial decomposition process as the rest of the range: 12 to 24 hours, at least 85% volume reduction, organic fertilizer out the other side. It is the size municipalities and large processors specify when one machine has to cover a full collection round.

Technical data

Model	CR-3000
Processing Capacity	3000kgs/day
Dimension (L*W*H)	4740*3390*2470mm
Weight	4800kgs
Rated Power	50KW
Power Supply	380V, 50Hz
Decomposition Method	Microbial Decomposition
Waste Volume Reduction	≥85%
Processing Time	12-24 Hours
Output	Organic Fertilizer
Material	Q235 + Spray Paint + Stainless Steel
Deodorization	Internal deodorization or optional extra deodoriser
Control System	Fully Automatic Intelligent Control, Automatic Fault Alarm
