

One unit per carton, 124 x 22 x 38 cm at 20 kg gross.

Every shipment leaves with a tracking number. Transit damage is covered by compensation.

STEP	CHECK
1	Photograph the carton before opening if there is any external damage
2	Check the OE number on the carton label against your order
3	Open and check the OE number on the rack itself matches the carton
4	Inspect both track rod ends, the bellows and the motor housing for impact
5	Confirm the driver side marking (LHD or RHD) before the vehicle is stripped
6	Report transit damage with photographs before installation
7	Keep the order reference: warranty runs 12 months from delivery
8	Follow the vehicle procedure, including steering angle sensor calibration if required
