

Company Profile

Chengdu Golden Wolfran Carbide Co., Ltd., trading as GW Material Tech.

The Company

Chengdu Golden Wolfran Carbide Co., Ltd is a professional cemented tungsten carbide manufacturer. The company was founded in 2012. It is an ISO certificated enterprise, located in Chengdu Hi-Tech West Zone, only 26 km and about 30 minutes from Chengdu international airport.

Products

We specialise in the development and production of cemented tungsten carbide. Main products include extrusion solid rods, tubes such as choke beans, plates, latches and other special shape parts. The wider offering includes carbide mining tools, snow plow inserts, shims, brazed tips, saw tips, carbide plates, strips, indexable inserts for milling, turning, threading, grooving and parting, blades, wear parts, tyre pins and other made to order parts.

Plant

The company covers more than 10 acres and the construction area is more than 5000 square metres. A specialised hard alloy production line runs from research and development through to finished product processing, with annual production of more than 100 tons. Main equipment: ball mill, extruding machine, hot isostatic press, two-way press, oil press, blank CNC machining centre, vacuum sintering furnace, pressure sintering furnace, cryogenic treatment system and high accuracy centreless grinding.

Markets

All kinds of products with good quality have been exported to Germany, the United States, Russia, Australia and other countries in recent years.

Service

Quotes in 24 hours or less. Competitive lead times. Personalized attention to your orders. Efficient, courteous service personnel. High-performance tools with minimal grindstock. Technical help with grade and preform design. Blanket order options. Dedication to continual quality improvements. All orders sinter-HIPped.

Industries Served

Oil and gas; mining and drilling; civil engineering and construction; woodworking; agriculture; metalworking.
