

Suzhou GY Marine Equipment Co., Ltd

Marine hardware, deck maintenance tools and ship stores

About

GY Marine is based in Suzhou, one of China's large mechanical manufacturing bases. We profit from this environment and develop the marine hardware and tools supplied through this catalogue.

Our products cover a wide range including mop buckets, stainless steel pedal dust bins, pneumatic scaling tools, electronic scaling machines, pneumatic vacuum cleaners, hold cleaning guns, punching tools, sampling bottles, oil jugs, flange jacks, pneumatic driven winches, gasket and washer cutters, scupper plugs, tank cleaning hose saddles, banding tools, banding buckles and bands, copper ring kits, O-ring kits, and couplings, bolts and nuts for tankers and ships. Accessories and parts for this marine hardware are available.

We are committed to providing innovative and customized products. Many marine suppliers and wholesalers at home have witnessed our development.

Catalogue At A Glance

182 catalogue items organised into 19 marine store groups, from group 15 cloth and linen products through to group 81 packing and jointing. Every product page on gymarine.com publishes the original manufacturer specification sheet so codes, sizes and ratings can be checked before ordering.

How We Work

Requisitions are received by WhatsApp or email and quoted line for line against catalogue codes. Anything that needs a size, material, voltage or rating confirmed is queried before quotation rather than assumed. Mixed store groups are consolidated into one shipment so the vessel takes a single delivery, and the packing list carries the same codes as the requisition.
