

3 Fold Silence Slide Datasheet

The 3 Fold Silence Slide is a telescopic drawer runner built from three members, which is what lets the drawer travel out to full extension. The listed specification is 45 mm wide in black iron, supplied in eight lengths from 6 to 20 inches and packed two pieces per pair. The same family is also produced in 40 mm and 35 mm widths, so a project can be standardised on one runner across cabinets of different depths.

Specifications

Width	45 mm
Main Material	Black iron
Product Size	6 / 8 / 10 / 12 / 14 / 16 / 18 / 20 inches
Application	Drawers
Packaging	2 pcs per pair
Production Time	3-10 working days after approval
Delivery Time	Based on the mode of shipping chosen
Other Widths Produced	40 mm (1.0 mm thickness), 35 mm (0.8 mm thickness)

Before You Order

- Measure the internal cabinet depth from the inside of the front to the inside of the back
- Choose the longest of the eight lengths that fits within that dimension
- Standardise on one width across a project - 45 mm on this model
- Order spares in pairs while the specification is current

Frequently Asked

What lengths are available?

Eight: 6, 8, 10, 12, 14, 16, 18 and 20 inches.

What is the width and material?

45 mm wide in black iron on this model. The same family is also produced at 40 mm in black iron and 35 mm in iron.

How are they packed?

Two pieces per pair, which is one drawer's worth.

What is the lead time?

Production is 3 to 10 working days after approval. Delivery time on top of that depends on the mode of shipping chosen.

How do I choose the right length?

Measure the internal depth of the cabinet and take the longest runner that fits inside it. Doing this at drawing stage rather than after the carcass is built avoids the usual compromise.
