# Commercial Terms and Capabilities

|                             |                                                                                                                                                                                           |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Minimum order</b>        | Varies by item. Chalkboards and wooden floor displays typically from 200 pieces, tap handles from 100 units.                                                                              |
| <b>Sample lead time</b>     | 7 to 20 days. Sample charge set from the product detail. Shipped by EMS, FedEx, UPS or DHL.                                                                                               |
| <b>Production lead time</b> | About 25 to 45 days after receipt of the 30% deposit or L/C at sight.                                                                                                                     |
| <b>Payment terms</b>        | T/T 30% deposit with the 70% balance against copy of documents, or L/C at sight.                                                                                                          |
| <b>Loading port</b>         | Shanghai, China.                                                                                                                                                                          |
| <b>Incoterms</b>            | FOB, CIF and DDP, with forwarder partners at origin and destination.                                                                                                                      |
| <b>Packing</b>              | One piece per carton in export standard double corrugated board, or to your specification.                                                                                                |
| <b>Shipping modes</b>       | By sea, by air or by express delivery.                                                                                                                                                    |
| <b>ODM and OEM</b>          | Yes. We work from your design or develop the concept from a brief.                                                                                                                        |
| <b>Materials</b>            | Wood, metal, acrylic, cardboard and mixed-material construction.                                                                                                                          |
| <b>Processes</b>            | Wood and metal fabrication, CNC cutting, laser cutting, welding, powder coating, robot spray painting, four-colour UV printing, prototype development, assembly planning, export packing. |
| <b>Printed branding</b>     | Four-colour UV imprinted logos on wooden, metal and PVC display surfaces last over 3 years.                                                                                               |
| <b>Design</b>               | POS industry designers with 3ds Max visualisation; engineering in SolidWorks to CAD and DXF.                                                                                              |
| <b>Facility</b>             | 10,000 sq ft assembly and build plant in Jiaxing, China, close to Shanghai port.                                                                                                          |
