

Shopping Bags and Everyday Totes Catalogue

4 models with published specifications, generated from the same data as intmango.com.

Reusable shopping bags fail on looks, not on function. A bag that a customer is embarrassed to carry stays in a drawer and is replaced with a plastic one at the till. This small family is styled first, in quilted puffer polyester, printed waterproof oxford and woven plastic basket, and sized second, which is why the same bags are bought for grocery programmes and for fashion accessory ranges.
