Aruba and HPE Switching Datasheet Pack

Aruba CX and HPE switching plus campus access points. PoE budget and uplink options are confirmed per model at quotation against the actual closet load.

Aruba switches (96 models)

Aruba switches bring performance and reliability to the mobile-first campus. These industry-leading switches are scalable, secure, and feature HPE Smart Rate multi-gigabit ports for high-speed connectivity. This series include This series include 2530 series, 2920 series, 2930F series, 3810M series, etc.

HPE Wireless (30 models)

Wireless access points (APs or WAPs) are networking devices that allow Wi-Fi devices to connect to a wired network. This then creates a WLAN to distribute a wireless signal from that location. An access point acts as a central transmitter and receiver of wireless radio signals. With the wireless access point, we are able to easily connect multiple devices to one LAN. Meet your wireless and mobility
