

Dongguan JEC Mold Co., Limited — a 50-person precision tool shop building export injection molds, die casting tooling and mold components since 2011.

Company Facts

Legal name	Dongguan JEC Mold Co., Limited
Trading name	JEC Mold
Founded	2011
People	50
Location	Building 43, Xinle Road, Bubugao Avenue, Wusha Community, Chang'an Town, Dongguan City, Guangdong Province, China
Telephone	+86 769 8563 5501
Fax	+86 769 8563 5502
Sales	eddy.liu@jec-mold.com
General	info@jec-mold.com
Website	https://jec-mold.com
Quality system	ISO 9001:2015 — Design, Manufacture and Service of Injection Molded Moulds; Manufacture and Service of Plastic Injection Molded Parts
Export markets	Europe, North America, Australia (90% of molds)
Quotation time	Within 2 working days
Response time	No later than 24 hours

Who We Are

JEC Mold is located in the South China Dongguan city, 40 minutes car drive to Shenzhen international airport, specialized in plastic injection mold making since 2011. We are a middle-sized tool shop with 50 people. Since the beginning of startup we have devoted ourselves to the precision mold-making business and export our high quality engineering molds worldwide. Our engineering team has been well trained with customers' mold standards to satisfy normal and special requirements.

JEC Mold has been working in this industry for more than a decade, but we never stop learning. We are always learning and growing together with our customers and keeping long-term relationships that benefit each of us.

90% of our molds serve global markets, such as Europe, America and Australia. We work efficiently and keep real-time communication with customers. Response to customers is no later than 24 hours.

The Six Services We Provide

- High quality plastic injection mold making — Engineering molds built for more than one million shots.
- Rapid prototype mold making — Low price and fast lead time for the stage before production tooling.
- Precision components making — CNC and EDM machined cavity, core and insert work sold on its own.
- Mold engineering — Practical MoldFlow study, DFM study, full 3D mold design and complex mold movement simulation.
- Die casting mold making — Aluminum die casting tooling built alongside our injection work.
- Professional mold quotation — Returned within two working days.

Product Categories

- Automotive Parts (12 products) — Injection molded automotive parts built from tools that hold their form across a full production run
- Die Casting Parts (5 products) — Aluminum die casting tooling and cast components for structural housings brackets and bases
- Home & Office Appliance Parts (9 products) — Large thin wall appliance housings covers and panels molded to a consistent visible finish
- Medical Parts (9 products) — Clear and thin wall medical components molded from tools finished to an optical cavity standard
- Mold Components (9 products) — Precision cavity plates core inserts and machined components cut ground and inspected in house
- Pipe & Tube Parts (9 products) — Molded connectors manifolds and fittings for fluid circuits that have to seal every time
- Plastic Injection Molds (12 products) — Complete engineering molds designed built tried and documented for export production
- Two-Shot (2K) Parts (6 products) — Two shot and over molded parts where two materials have to meet on a line you can see
