

MAGNETIC WIRELESS CHARGER

KIKOO Mag Desktop Lamp Wireless Charging Stand

A desk lamp and a 15W magnetic wireless charger in one object, with a three-gear adjustable night light and a magnetic mount for the phone.

Overview

Two objects that always end up on the same nightstand, combined into one. The ribbed shade is a three-gear adjustable night light, and the magnetic head is a 15W wireless charger that holds the phone at a viewing angle. For a retail range this is the SKU that sells on appearance rather than on specification: it is the one product in the KIKOO Mag family that a customer buys because of how it looks on a bedside table. Published facts are the 15W magnetic charging and the three brightness gears; input, lamp output and dimensions are confirmed per order.

Published Specification

Property	Value
Type	Desk lamp with magnetic wireless charging stand
Wireless output	15W
Night light	Three adjustable brightness gears
Input	Not published on the source page; confirmed per order
Dimensions	Not published on the source page; drawing on request
Certification	Confirmed per order; not published on the source page

Rows reading 'not published on the source page' or 'confirmed per order' are figures the factory specification does not publish. They are confirmed in writing rather than estimated.

Key Benefits

- Replaces two nightstand objects with one, which is the argument that sells it
- 15W magnetic wireless charging, the standard Qi2 power class
- Three brightness gears, so it works as a reading light and as an overnight glow
- A design-led SKU in a range that is otherwise specification-led
- Magnetic mount holds the phone upright, so an alarm or standby display stays visible

Technical Features

- 15W magnetic wireless charging
- Three-gear adjustable night light
- Magnetic phone mount at a fixed viewing angle
- Lamp and charger share one power input

Use Guide

- Power from a PD adapter capable of supporting 15W wireless output plus the lamp
- Cycle the brightness gears with the touch control on the shade
- Magnetic hold falls with case thickness
- Ask for the dimension drawing before designing retail packaging

Applications

- Bedside table: night light, alarm display and charger in one
- Hotel rooms where socket count is limited
- Gifting ranges that need an object rather than an accessory
- Desk lighting with the phone held at eye level
