

MAGNETIC WIRELESS POWER BANK

KIKOO Mag Qi2 Ultra-Slim Magnetic Power Bank, 5000mAh And 10000mAh

One ultra-slim magnetic platform in two capacities, 5000mAh and 10000mAh, both Qi2 certified at 15W wireless with a 20W Type-C output. Models KIKOOP30Qi2MAG-5000 and -10000.

Overview

This is the range's answer to the complaint that magnetic packs are too thick to leave on the phone. One slim platform is built in two capacities so a retailer can stock a light everyday version and a full-day version that look and feel identical on the shelf. Both are Qi2 certified at 15W, both carry a 20W Type-C port and a 5W TWS output, and both use an ABS+PC housing in black or white. Published certifications are Qi2, CE, FCC, ROHS, MSDS, IEC62368-1, UL2056 and UN38.3.

Published Specification

Property	Value
Model numbers	KIKOOP30Qi2MAG-5000, KIKOOP30Qi2MAG-10000
Battery capacity	5000mAh or 10000mAh
Wireless output	15W max
TWS earphone output	5W max
Type-C output	5V/3A, 9V/2.22A, 12V/1.67A (20W)
Input	5V/3A, 9V/3A, 12V/2.25A
Material	ABS+PC
Colour	Black / White
Certification	Qi2, CE, FCC, ROHS, MSDS, IEC62368-1, UL2056, UN38.3

Rows reading 'not published on the source page' or 'confirmed per order' are figures the factory specification does not publish. They are confirmed in writing rather than estimated.

Key Benefits

- Two capacities on one slim platform: one approval, one packaging design, two shelf SKUs
- Qi2 certified at 15W rather than an uncertified 15W claim
- Slim enough to stay attached to the phone in a pocket, which is the whole point of a magnetic pack
- 20W Type-C for cable charging in and out
- Full battery compliance set published

Technical Features

- Qi2 certified, 15W maximum wireless output
- TWS earphone output, 5W maximum
- Type-C output 5V/3A, 9V/2.22A, 12V/1.67A (20W)

- Input 5V/3A, 9V/3A, 12V/2.25A
- Models KIKOOP30Qi2MAG-5000 and KIKOOP30Qi2MAG-10000

Use Guide

- Choose 5000mAh for thickness, 10000mAh for runtime; the electrical spec is otherwise the same
- Attach to a MagSafe iPhone or a magnetic-cased Qi2 ready Android phone
- Use the Type-C port at 20W when speed matters
- Recharge through the same Type-C port
- Lithium shipping rules apply to both capacities

Applications

- A two-SKU magnetic range where the only visible difference is capacity
- Everyday carry attached to a MagSafe iPhone
- Promotional runs where slimness is the selling point
- Charging an earbud case from the 5W output
