

MAGNETIC WIRELESS CHARGER

Qi2 15W MagSafe Car Wireless Charger Bracket

A Qi2 15W magnetic car charger on a vent bracket, 30 x 68mm excluding the bracket, 160g, running from a 9-12V/2A car supply. Glass or silicone phone contact surface.

Overview

A car charger that actually holds the phone: the magnetic head takes the place of a spring clamp, so the phone attaches one-handed and stays aligned over the coil through a rough road. Output is the Qi2 15W class at MPP 15W maximum, from a 9-12V /2A car supply. The charging head is 30 x 68mm without the bracket and the assembly weighs 160g. The phone contact surface is offered in glass or silicone, and the bracket is selected to match: different vent geometries need different mounts.

Published Specification

Property	Value
Wireless output	MPP 15W max
Standard	Qi2 magnetic / MagSafe compatible
Input	DC 9V-12V/2A
Product dimension	30 x 68mm (excluding bracket)
Net weight	160g
Contact surface	Glass or silicone
Bracket	Selected per vehicle vent type
Certification	Confirmed per order; not published on the source page

Rows reading 'not published on the source page' or 'confirmed per order' are figures the factory specification does not publish. They are confirmed in writing rather than estimated.

Key Benefits

- Magnetic attach instead of a clamp: one hand, no adjustment, no scratched phone edges
- Qi2 15W (MPP 15W max), which is the full magnetic power class rather than a 7.5W car compromise
- Glass or silicone contact surface, so the specification can match the finish the brand wants
- Different bracket options for different vent geometries, quoted as part of the configuration
- Published mechanical data: 30 x 68mm charging head, 160g assembly

Technical Features

- Qi2 magnetic wireless charging, MPP 15W maximum
- Input DC 9V-12V/2A
- Charging head 30 x 68mm, excluding bracket

- Net weight 160g
- Phone contact surface in glass or silicone; bracket selected to match

Use Guide

- Run it from a car supply that can hold 9-12V at 2A; a weak socket adapter will throttle the output
- Choose the bracket against the target vehicle's vent geometry before the order
- Glass reads as premium, silicone grips and forgives vibration; pick per market
- Magnetic hold falls with case thickness and with metal plates already stuck to the phone

Applications

- Navigation on a phone held at eye level in a vent mount
- Ride-hailing and delivery drivers charging through a shift
- Fleet vehicles fitted with a standard accessory package
- Automotive aftermarket and accessory retail
