

OTG ADAPTER

USB-A Female To USB-C Male OTG Adapter

A small aluminium OTG adapter that turns a USB-C phone or laptop port into a USB-A socket, for flash drives, keyboards, card readers and mice. Published in several anodised colours.

OTG

USB to Type C

Overview

The smallest product in the range and one of the most useful: a USB-A socket on one end, a USB-C plug on the other, so a phone or a modern laptop can accept the USB-A devices the world is still full of. It handles data transfer and charging, and the anodised aluminium body is published in several colours, which makes it viable as a branded giveaway as well as a retail line. Retail blister and poly bag packing are both available.

Published Specification

Property	Value
Type	USB-A female to USB-C male OTG adapter
Function	Data transfer and charging
Housing	Anodised aluminium
Colour	Several anodised colours; confirmed per order
Driver	Not required
Packing	Retail blister card or poly bag
Transfer rate	Confirmed per order; not published on the source page
Certification	Confirmed per order; not published on the source page

Rows reading 'not published on the source page' or 'confirmed per order' are figures the factory specification does not publish. They are confirmed in writing rather than estimated.

Key Benefits

- Turns a USB-C port into a USB-A socket, which is what makes a phone useful with a flash drive
- Anodised aluminium body in several published colours, unusual at this size and price
- Handles data transfer and charging rather than data only
- Small enough to live on a keyring or in a laptop sleeve
- Available in retail blister or poly bag packing

Technical Features

- USB-A female to USB-C male
- Supports data transfer and charging
- Anodised aluminium housing
- No driver required

- Retail blister or poly bag packing

Use Guide

- The host device has to support USB OTG; most modern phones, tablets and laptops do
- High-draw USB-A devices may need their own power, because the phone supplies limited current
- Choose blister packing for retail shelves and poly bag for bundles and giveaways
- Specify the colour split at the quotation stage

Applications

- Reading a USB flash drive on a phone or a tablet
- Connecting a keyboard, mouse or card reader to a USB-C laptop
- Promotional giveaways at events, in brand colours
- Retail impulse lines beside phone cases and cables
