## From first message to delivered cartons

### 01 Send the design

Sketches, a tech pack, a design file or photos of a reference garment are all enough to start. We come back with questions on fabric, trims and technical requirements.

### 02 Fabric and trim sourcing

Guangzhou sits next to the largest fabric and trim market in the world. We send fabric photos and video so you can see and understand the base before it is bought.

### 03 Sample development

Samples take about 5-7 working days. We photograph and film them during making so you can comment before they ship.

### 04 Revision and approval

If anything needs changing we revise the sample. Nothing moves to bulk until you have approved a physical piece.

### 05 PP sample and bulk

After the deposit we buy fabric and make a pre-production sample against the final order sheet. Bulk runs 4-5 weeks.

### 06 Inspection and shipping

Four inspection stages, then we handle the shipping paperwork and arrange delivery to your door.

### Talk to us

Send a sketch, a design file or a photo of a reference garment with your target quantity per colour. We come back with fabric options, a sample plan and a price.
