6-704 Tiychang Road, Kunshan City, Jiangsu Province, China

Custom Keychains

Struck metal keychains with real relief, made to survive a pocket full of keys rather than a single trade show.

3D Keychain

Real relief on both faces, so the charm reads as an object rather than a token

Minimum Order: 100 pieces per design

Base Metal: Brass, iron or zinc alloy depending on the form

Relief: Three dimensional, struck on both faces

Finish Options: Plain polished, enamel filled or antique

Die Struck Pins And Metal Gifts

Struck metal with no colour fill, plus the pendants and medal pieces made the same way, where the form and the finish carry the design.

Custom Necklace

Worn by people who will not put a pin through a garment they care about

Minimum Order: 100 pieces per design

Pendant Base Metal: Brass or iron

Finish Options: Plain struck, enamel filled or antique polished

Plating Options: Gold, silver, nickel, black nickel, antique finishes

Hard Enamel Pins

Die struck pins filled, fired and polished flat, for badges that have to survive years of wear rather than one weekend.

Silkscreen Lapel Pin

Handles fine detail, small text and gradients that enamel cannot reproduce

Minimum Order: 100 pieces per design

Base Metal: Brass or iron

Colour Application: Silkscreen printing, cured ink

Plating Options: Gold, silver, nickel, black nickel, antique finishes

Transparent Color Pin

Clear epoxy coating protects the enamel color from everyday handling and display wear

Product Category: Hard enamel pin

Finish: Transparent color

Minimum Order: 100 pieces per design

Sample Lead Time: 3-5 days

Hard Enamel Lapel Pin

Polished flat face resists scratching, so a daily-worn pin still reads as new after years

Minimum Order: 100 pieces per design

Base Metal: Brass or iron

Colour Fill: Hard enamel, kiln fired and polished flat

Plating Options: Gold, silver, nickel, black nickel, antique finishes

Offset Printed Pins

Offset printed pins and mirrors for artwork that enamel simply cannot reproduce: photographs, gradients and unlimited colour.

Offset Printing Pin

Reproduces full-colour gradients and photographic detail without needing separate metal lines for each colour

Minimum Order: 100 pieces per design

Base Metal: Brass or iron

Printing Method: Offset printing with epoxy coating

Plating Options: Gold, silver, nickel, black nickel, antique finishes

Soft Enamel Pins

Die struck pins with colour set below raised metal lines, the most flexible and most affordable way to put detailed artwork on metal.

Glitter Lapel Pin

Metallic flake makes a small pin visible across a crowded room or trade stand

Minimum Order: 100 pieces per design

Base Metal: Brass or iron

Colour Fill: Soft enamel with metallic flake blended in

Surface Option: Bare enamel or clear epoxy dome

Soft Enamel Lapel Pin

Costs less per piece than hard enamel at the same size and colour count

Minimum Order: 100 pieces per design

Base Metal: Brass or iron

Colour Fill: Soft enamel, cured and left recessed below the metal lines

Surface Option: Bare enamel or clear epoxy dome

How To Order

- 2 Quotation
- 3 Vector Proof
- 4 Die Cutting
- 5 Sample Approval
- 6 Die Striking
- 7 Colour Filling
- 8 Plating And Finishing
- 9 Inspection
- 10 Packing And Despatch

What to send with your enquiry

- The artwork, ideally as an Adobe Illustrator file; JPG, PNG and PDF also work
- The quantity per design, keeping in mind the minimum is 100 pieces
- The finished size you want, or the size the badge has to fit onto
- The process if you already know it: hard enamel, soft enamel, die struck, offset printed or silkscreen
- The date you need the goods in hand, and the destination country
