Certification Overview

All products are strictly produced according to European standards and are sold well in European countries. Our factories are certified by ISO, CE and SGS. The pages that follow reproduce the certificates supplied to us by our manufacturing partners. Material certificates and test certificates for a specific order are issued when they are requested at the time of order.

Soft slings

EN 1492-1 and EN 1492-2. A CE declaration of conformity is packed with every sling.

Cargo lashing

EN 12195-2. Test certificates available on request at the time of order.

Grade 80 rigging

Individually proof tested at 2.5 times the working load limit, fatigue tested at 1.5 times the working load limit for 20000 cycles, 100 percent magnaflux crack detection.

Grade 80 chain

EN 818-2 for chain slings and EN 818-7 for hoist load chain, marked with G80, identification marks and batch number.

Manual hoists

Designed in accordance with EN 13157 and the CE regulations, running test load applied to every unit.

Snatch blocks

Manufactured according to ISO 9001, CE approved, 200 percent overload test one by one. DY type carries CE and GS.

Permanent lifting magnets

Break away force at least three times the rated capacity. Test certificate and operating instructions with every magnet.

Ton bags

Qualified supplier certified by SGS. Passed the 6:1 qualification test of German LABORDATA according to ISO 21898.
