

Lumenlily Crystal Wrist Size Guide

Every design in the range is strung in three lengths: S at 13-15 cm, M at 16-18 cm and L at 19-20 cm.

The three lengths

Every design is strung in S at 13-15 cm, M at 16-18 cm and L at 19-20 cm.

Measuring the wrist

Wrap a soft tape or a strip of paper around the wrist just below the wrist bone and read the length where the two ends meet. Do not pull it tight.

Bead size changes the fit

A large-bead strand takes up more of the circumference than a small-bead one, so the same wrist can sit at the top of one size range and the bottom of another.

When you are between sizes

Order the larger length. A bracelet that turns freely on the wrist is more comfortable and puts less strain on the strand.
