1 A reference image

A photograph, a sketch or a render of the form you have in mind. This is the starting point the workshop actually quotes from.

2 The height

And the width or diameter if the piece is not simply upright. Installed work recorded on this site runs from 160 cm in a private garden to 3750 mm in a lobby.

3 Where it will stand

Indoor lobby, garden, public square, water feature or roof. The scheme is designed against the environment, so the site changes the form as well as the finish.

4 Material and finish, if you know them

Stainless steel, corten, bronze or fiberglass; mirror, brushed, painted or gold. If you do not know, describe the look you want and we will advise.

5 The date it has to be standing

Production is stated as 35 to 45 days depending on the piece, and sea freight sits on top of that. Work backwards from the opening, not forwards from the order.

6 Anything the site imposes

Crane access, door widths for interior work, foundation limits, wind exposure, or a planning condition on height or colour.

What comes back

A price against your brief

Quoted from the reference, the size and the site.

A scheme rather than a copy

Designed against the environment, which sets content, form and colour.

A scale model step on large work

Complex or large pieces are modelled small and scaled up, with the internal support designed alongside.

Crating and delivery

Wooden case packing on a Factory Direct and Door to Door Delivery basis.
