

Track Rails Datasheet

Three-wire and four-wire commercial track rail in 1, 1.5, 2 and 3 metre lengths, matched to our own track head range.

Founded	2010
Fixtures Per Month	780000
Factory Area	5000 m ²
Workers	120
Certification	ISO 9001:2015, CE, RoHS, CCC, CQC
Contact	WhatsApp +86 139 2862 0546 · xjl0327@hotmail.com · +86-757-86636899

All figures in this document are the published specifications for the models listed. Ask for the IES file or a Dialux calculation before finalising a layout.

3 Wire LED Track Rail

This is the three-wire track rail that carries the MSTARLED track head range. It runs on single-phase 220V and is supplied in 1, 1.5, 2 and 3 metre lengths in black or white, so a run can be set out to the ceiling grid without cutting on site. Three wires means the heads on one rail can be split across separate switched circuits, which is what lets a shop turn window lighting, wall wash and general lighting on and off independently. Order the rail together with heads carrying a matching three-wire adapter.

Specification

Type	3 wire LED track rail
Supply	Single phase 220V
Lengths	1m, 1.5m, 2m, 3m
Finish	Black, white
Head Adapter Required	3 wire

Certification: CE, RoHS, CCC, CQC, ISO 9001:2015 quality system

4 Wire LED Track Rail

This four-wire track rail is built to the same section size as Nordic Track, so it drops into projects already specified around that profile and accepts heads sized for it. It is rated at 16A and comes in 1, 1.5, 2 and 3 metre lengths. Four conductors give three switchable lighting groups on one run, which is what a large retail floor or a hotel public area needs when window, feature and general lighting have to be controlled separately. Order it with MSTARLED heads carrying a four-wire adapter.

Specification

Type	4 wire LED track rail
Current Rating	16A
Profile	Same size as Nordic Track
Lengths	1m, 1.5m, 2m, 3m
Head Adapter Required	4 wire

Certification: CE, RoHS, CCC, CQC, ISO 9001:2015 quality system
