

RIDE CATEGORY DATASHEET

Christmas Amusement Rides

Carousels, trains, Ferris wheels and self-control planes finished in Christmas theming for markets, grottos and winter events.

What This Category Is For

A Christmas market lives or dies on the six weeks it trades. The ride has to arrive themed, not get themed on site, and it has to read as Christmas from across a crowded square. This range is the standard BigJoys mechanical platform, in FRP over steel, finished with reindeer, tree, snow and festive cabin theming: a 16-seat carousel, a 12m diameter Christmas Tree ride taking 32 people, a 5-cabin Ferris wheel, trackless and tracked trains and a 16-seat self-control plane.

Why Operators Choose This Range

- Themed in the works, in FRP over steel, not dressed on site
- Sizes from a 2.4m high 6-seat carousel to a 12m diameter 14m high Christmas Tree ride
- Single-phase options: the 6 Riders Christmas Carousel runs on 220V/1600W
- Christmas Train A listed at 110V or 220V for markets outside the 380V world
- Graphics wraps can be changed for Halloween, Easter and other seasons on the trailer range

Problems It Solves

- Generic rides that have to be dressed on site every November and stripped every January
- Attractions too tall for a covered market hall or a low square
- Six-week trading windows that cannot absorb a long installation
- Single-phase-only pitches in historic town centres
- Rides that do not photograph well, so the event gets no social reach

Who It Is For

- Christmas market and winter festival organisers
- Shopping centres running a grotto or a festive attraction
- Municipal event teams dressing a town square
- Travelling operators working a winter circuit

Application Scenarios

- Town square Christmas markets
- Shopping centre festive attractions and grottos
- Ski resort and winter holiday parks
- Indoor festive events in exhibition halls

Materials

- Published per model on the product page; where the manufacturer states no material, the page says so rather than estimating one.

Manufacturing Process

1. Design Review: Dimensions, capacity and theme are agreed in writing before production starts.
2. Fabrication: Structure is fabricated and finished to the specification agreed.
3. Assembly: The unit is assembled complete in the works.
4. Inspection: Fixings, finish and, on powered units, the drive and control panel are checked.
5. Packing: Packed for container loading with decorative surfaces protected.
6. Loading: Loading photographs are sent before the container leaves.

Customisation Options

- Theme, colours and printed graphics changed before production
- Supply voltage built to your site: 110V, 220V or 380V depending on the model

- Dimensions and capacity adjusted where the structure allows
- Custom design is marked acceptable across every category on the source catalogue

Certification Standards

The company holds ISO 9001:2015 quality system, certificate 4742SQ0047805, scoped to sales and export of amusement equipment, CE attestations of conformity under Machinery Directive 2006/42/EC held by product family, ECM certificate 0P241231.ZBAWW48 for amusement rides, referencing EN 13814-1:2019+A1:2023 and EN 1176-1:2017+A1:2023, Ask for the attestation covering the product family this model belongs to before shipment. Attestations are issued by product family and are sent on request.

Questions Buyers Ask

How tall is the Christmas Tree ride?

The published specification is 12m diameter by 14m high, capacity 32 persons in 8 cabins, on 15KW at 380V. Check your overhead clearance and any local height consent before ordering.

Is there a Christmas ride that runs on single-phase power?

Yes. The 6 Riders Christmas Carousel is listed at 220V, 1600W, and Christmas Train A at 110V or 220V.

Can the same ride be re-themed for another season?

On the trailer playground range the factory states the graphic artwork can be customised for Halloween, Easter and other holiday themes. On the mechanical rides the theming is moulded FRP, so re-theming means new bodywork.

What is the lead time for a Christmas order?

Lead time is not published on the source site and depends on the model and whether the unit is held in stock. Thirty-nine models are listed as in stock for immediate shipment once payment is received.

Do the Christmas rides carry CE marking?

The company holds CE attestations of conformity under Machinery Directive 2006/42/EC covering carousel, electric train, family rides and trailer rides product families. Ask for the certificate covering the specific model you are buying.
