

RIDE CATEGORY DATASHEET

Halloween Theme Amusement Rides

Pumpkin-themed cup carousels, race tracks, bouncy slides and inflatable moonwalks for October trading.

What This Category Is For

Halloween is a four-week trade and the theming has to be unmistakable from the gate. This range is pumpkin-led: a 6-cup carousel taking 24 people over a 6m diameter, a trailer-mounted pumpkin race on a 20ft track, a pumpkin bouncy slide and a Halloween inflatable moonwalk. Inflatables pack down to almost nothing, which matters when the whole attraction has to be in storage by the first week of November.

Models In This Category

Why Operators Choose This Range

- Pumpkin Cup Carousel A listed at 6 cups, 24 persons, 6m diameter by 3.5m high on 3.5KW
- Trailer Pumpkin Race supplied on a 20ft track or customised to your length
- Inflatables pack down small for eleven months of storage
- Pedal-driven pumpkin race needs no mains supply
- Themes carried across the same mechanical platforms used all year

Problems It Solves

- A four-week season that cannot carry a long installation
- Theming that has to be stored for eleven months of the year
- Wet October ground that will not take heavy plant
- Attractions that only work after dark
- Pumpkin patches with no power at the field gate

Who It Is For

- Pumpkin patches and Halloween farm events
- Theme parks running a seasonal overlay
- Town centre and shopping mall October events
- Rental companies supplying Halloween attractions by the week

Application Scenarios

- Pumpkin patch paid-attraction areas
- Theme park Halloween overlays
- Town centre trick-or-treat trails
- Indoor Halloween events in shopping centres

Materials

- Published per model on the product page; where the manufacturer states no material, the page says so rather than estimating one.

Manufacturing Process

1. Tube Cutting And Bending: Galvanised tube is cut and formed to the frame drawing.
2. Welding And Fabrication: Frame, chassis or track sections are welded and squared.
3. Powder Coating: Finished steelwork is powder coated, the outdoor finish used across the trailer and track ranges.
4. Panel Fitting: PE panels, mesh barriers and decorative printed panels are fitted to the frame.
5. Trial Assembly: Sections are trial assembled so they go together on site first time.
6. Packing: Sections are packed for container loading with the decorative surfaces protected.

Customisation Options

- Theme, colours and printed graphics changed before production
- Supply voltage built to your site: 110V, 220V or 380V depending on the model

- Dimensions and capacity adjusted where the structure allows
- Custom design is marked acceptable across every category on the source catalogue

Certification Standards

The company holds ISO 9001:2015 quality system, certificate 4742SQ0047805, scoped to sales and export of amusement equipment, CE attestations of conformity under Machinery Directive 2006/42/EC held by product family, ECM certificate 0P241231.ZBAWW48 for amusement rides, referencing EN 13814-1:2019+A1:2023 and EN 1176-1:2017+A1:2023, Ask for the attestation covering the product family this model belongs to before shipment. Attestations are issued by product family and are sent on request.

Questions Buyers Ask

How many riders does the pumpkin cup carousel take?

Pumpkin Cup Carousel A is published at 6 cups and 24 persons, over a 6m diameter footprint 3.5m high, on 3.5KW.

Are the inflatables supplied with a blower?

Blower specification is quoted with the unit. The source catalogue does not publish blower ratings, so confirm it in writing before shipment.

How short can the trailer pumpkin race track be?

The trailer version is published at 20ft long or customised as requested, which is the shortest track in the range.

Can pumpkin theming be swapped onto a trailer playground?

Yes. The factory states the arched banner, front skirt and side panels on the trailer playground range can be printed for Halloween as well as Christmas.

Is this equipment safe to run on wet autumn ground?

Trailer units carry extendable levelling support legs so the structure is locked rather than resting on soft ground. Ground bearing and anchoring on your own site remain the operator's responsibility.
