

RIDE CATEGORY DATASHEET

Other Attractions

Indoor soft playgrounds, trampoline park layouts, bumper cars and combination play structures that sit outside the themed ride ranges.

What This Category Is For

Not every attraction is a ride. This group covers the fixed indoor equipment BigJoys supplies alongside the mechanical ranges: combination soft playgrounds in galvanised tube with soft protective covering, full trampoline park layouts, a roofed trailer soft playground and bumper cars. Custom made design is accepted across the whole group, which is how most indoor halls are actually specified, against a floor plan rather than against a catalogue page.

Models In This Category

Product	Group	Summary
Trailer Mounted Soft Playground with Roof B	Other Attractions	The Trailer Mounted Soft Playground with Roof brings all-weather kids fun to any location. Built on a towable trailer with a protective roof, this 7.5m×7.5m unit features galvanized steel and soft PE materials. It's ready to deploy instantly, keeping kids.

Why Operators Choose This Range

- Custom made design accepted across the group
- Kids Combination Soft Playground published at 800cm x 400cm x 420cm high
- Galvanised tubes with soft protective covering as the standard construction
- Trampoline park layouts supplied as designs rather than as fixed products
- Combination indoor playground covered by a CE attestation of conformity

Problems It Solves

- An indoor hall with an awkward column grid that no catalogue layout fits
- Low ceilings that rule out standard play towers
- Soft play that dates within two seasons
- Mixed age groups that need separate zones in one room
- Buyers with a floor plan and no idea what will fit on it

Who It Is For

- Indoor family entertainment centre operators
- Trampoline park developers
- Shopping centre landlords converting vacant units
- Hotels, resorts and holiday parks with an indoor wet-weather room

Application Scenarios

- Indoor FEC and soft play halls
- Trampoline parks in converted retail or industrial units
- Hotel and holiday park kids clubs
- Wet-weather rooms at outdoor attractions

Materials

- Galvanized tubes+PE

Manufacturing Process

1. Tube Cutting And Bending: Galvanised tube is cut and formed to the frame drawing.
2. Welding And Fabrication: Frame, chassis or track sections are welded and squared.
3. Powder Coating: Finished steelwork is powder coated, the outdoor finish used across the trailer and track ranges.
4. Panel Fitting: PE panels, mesh barriers and decorative printed panels are fitted to the frame.
5. Trial Assembly: Sections are trial assembled so they go together on site first time.
6. Packing: Sections are packed for container loading with the decorative surfaces protected.

Customisation Options

- Theme, colours and printed graphics changed before production
- Supply voltage built to your site: 110V, 220V or 380V depending on the model

- Dimensions and capacity adjusted where the structure allows
- Custom design is marked acceptable across every category on the source catalogue

Certification Standards

The company holds ISO 9001:2015 quality system, certificate 4742SQ0047805, scoped to sales and export of amusement equipment, CE attestations of conformity under Machinery Directive 2006/42/EC held by product family, ECM certificate 0P241231.ZBAWW48 for amusement rides, referencing EN 13814-1:2019+A1:2023 and EN 1176-1:2017+A1:2023, Ask for the attestation covering the product family this model belongs to before shipment. Attestations are issued by product family and are sent on request.

Questions Buyers Ask

Can you design to our floor plan?

Yes. The source site marks this group as custom made design acceptable, and the trampoline park entries are published as designs rather than fixed-dimension products.

What is the standard soft playground construction?

The published material for the Kids Combination Soft Playground is galvanised tubes with soft cover protection.

Is there a CE certificate for indoor playgrounds?

A UDEM attestation of conformity under Machinery Directive 2006/42/EC is held with the product name Combination Indoor Playground. Ask for the copy covering your configuration.

What ceiling height do I need?

The published combination playground is 420cm high. Trampoline park layouts vary, so send your ceiling height with the floor plan.

Do you install as well as supply?

Installation scope is agreed per contract. Guidance is given over WhatsApp and email; on-site labour is quoted separately where it is offered.
