

## Company Profile

PEAK PCB LIMITED, printed circuit board fabrication and assembly in Shenzhen since 2000.

### The Company

PEAK PCB LIMITED deals in the development and production of printed circuit boards and PCBA, and was founded in 2000. The plant is located in Xinhe Industrial Park, Fuyong, Bao'an, Shenzhen, covering over 10,000 square feet, and holds ISO 9001:2000, ISO 14001:1996 and UL certification.

To achieve quality control the company invested in advanced facilities from the USA, Japan, Germany and Israel, and adopted international technology and management practice through work with foreign customers.

### Products And Services

| FAMILY               | CAPABILITY                                                             |
|----------------------|------------------------------------------------------------------------|
| <b>Rigid PCB</b>     | FR4, 1 to 16 layers, up to 450 x 660 mm, 0.075 mm trace and space      |
| <b>Aluminium PCB</b> | Metal core, 0.3 to 3.0 mm, 1 °C/W laminate thermal resistance          |
| <b>Flexible PCB</b>  | PI, PET and FR4, 0.05 mm track and gap, ±0.05 mm outline               |
| <b>PCBA</b>          | Surface mount, through-hole and mixed assembly on all three substrates |
| <b>Fast turn PCB</b> | Prototypes built on the production process                             |
| <b>PCB design</b>    | Manufacturability review against published capability                  |

### Markets Served

Industrial control, telecommunication, medical, automotive and computing.

### Quality And Environment

- Comply with environmental regulations
- Prevent any environmental accidents
- Prevent pollution and reduce wastage
- Minimise the consumption of resources
- Educate employees in environmental awareness
- Maintain an environmental management system and strengthen environmental policy
- RoHS compliance and lead-free processing
