

Product Catalog

Decorative LED lighting produced in Shanghai since 2014

Rainber manufactures decorative LED lighting: Christmas and festival string lights, Halloween figure lights, curtain and icicle lights, ribbon and tinsel lights, and garden and camping lanterns.

We have been in the lighting business since 2014, we run our own production line rather than buying finished goods on the market, and we keep an R&D; team so new ideas can go from drawing to shelf within a season.

Lengths, LED counts, light colour and power options are confirmed in writing for each order rather than published, because they are set for your market and price point. The specification points to confirm are listed under every product.

Festival Lights

The Christmas and seasonal range: curtain lights, icicle strings, ribbon lights, tinsel strips, ornaments and figure lights that dress a whole display from one supplier.

LED Curtain Light

A hanging curtain of vertical LED drops for windows, walls, pergolas and backdrops.

Key benefits

- Covers a full surface with one product instead of a dozen separate strings
- Hangs from a single top line, so installation is one task not a layout exercise
- Reads as a finished display from the street, which is what drives the photo and the sale

Confirm on quotation: Curtain width and drop length, Number of drops and LEDs, Light colour and lighting mode, Power option and plug type, Indoor or outdoor version, Packaging and carton format

Outdoor Waterfall Icicle Light

Dense icicle drops for rooflines, eaves, balconies and planting, with a falling-water look.

Key benefits

- Turns a roof edge or balcony rail into the main feature of a display
- Varied drop lengths give depth that a straight string cannot produce
- Visible from a distance, which is what outdoor display is bought for

Confirm on quotation: Run length and drop density, Drop length range, Light colour and lighting mode, Power option and plug type, Protection rating required, Connector and extension needs

LED Satin Ribbon Light

Printed satin ribbon with LEDs threaded along it, used as a lit bow or garland.

Key benefits

- Behaves like ordinary ribbon, so no special skill is needed to use it
- Adds light to places where a cable would look wrong, such as a bow or a wreath
- Strong impulse item at retail because the lit ribbon is instantly understood

Confirm on quotation: Ribbon width and roll length, Printed pattern or plain satin, Light colour and lighting mode, Battery or plug power, Number of LEDs per roll, Retail pack format

Colorful Tinsel Strip Light

Lit tinsel garland that combines volume and light in one length.

Key benefits

- Volume and light in one product instead of two bought separately
- Fills gaps on a tree or shelf edge that a bare string cannot fill
- Produced plain or with attached figures for a higher price point

Confirm on quotation: Garland length and tinsel density, Plain or with attached figures, Light colour and lighting mode, Power option and plug type, LED spacing, Carton and retail pack format

Christmas Star and Gift Hanging Light

Hanging string of lit stars, gift boxes and Merry Christmas lettering.

Key benefits

- Shapes read clearly at close range, which point lights do not
- Lettering gives a display a message rather than just illumination
- Light pieces that hang from a branch, a rail or a hook without fixings

Confirm on quotation: Shapes required and piece size, Number of pieces per string, Light colour and lighting mode, Battery or plug power, String length, Retail pack format

Christmas Ornament and Wreath Light

Lit baubles, hanging ornaments and pre-lit wreaths for tree and door.

Key benefits

- Each piece works on its own, so display and repeat purchase are simple
- A pre-lit wreath is a complete door display in a single item
- Light is built into the ornament, so there is no separate string to hide

Confirm on quotation: Ornament types and piece sizes, Wreath diameter and decoration, Light colour and lighting mode, Battery type or power option, Hanging format, Retail pack format

Christmas Santa Claus Figure Light

Moulded Santa figure lights on a string, for windows, counters and children's displays.

Key benefits

- Instantly recognisable figure that sells itself on the shelf
- Lit from inside, so the figure stays readable rather than glaring
- One string hangs a whole row of figures in a single pass

Confirm on quotation: Figure size and figures per string, String length and spacing, Light colour and lighting mode, Battery or plug power, Figure finish and colours, Retail pack format

Garden Fence and Facade Light

Long outdoor runs for fences, garden borders and house facades.

Key benefits

- Outlines a boundary so the whole property reads as decorated
- Long runs with simple fixing, which keeps installation labour low
- Works on fences, borders, low walls and facade lines

Confirm on quotation: Run length and LED spacing, Light colour and lighting mode, Power option and plug type, Protection rating required, Connector and extension needs, Carton and retail pack format

Garden and Camping Lights

Outdoor decorative lighting for patios, gardens and camping, built to sell in the months when the Christmas shelf is empty.

Solar Flame Effect Lantern

Portable lantern with a moving flame effect and a rope handle, for patio, garden and camping.

Key benefits

- Gives the look of an open flame where a real flame is not allowed
- Carries and hangs by its rope handle, so it moves around the garden with the customer
- Sells through spring and summer rather than only in the fourth quarter

Confirm on quotation: Lantern height and diameter, Battery capacity and runtime, Charging method and solar panel rating, Lighting modes required, Protection rating required, Retail pack format

Halloween Lights

Halloween figure lighting that gives retail a second decorative season before the Christmas display goes up.

Halloween Pumpkin and Figure Light

Pumpkin, ghost, skull, skeleton and spider web lights for the Halloween season.

Key benefits

- Covers the whole Halloween display from impulse string to full room piece
- Figures are lit from inside, so faces stay readable at night
- Small and light, which keeps freight cost per selling unit low

Confirm on quotation: Figures required and figure size, Figures per string and string length, Light colour and lighting mode, Battery or plug power, Remote control or timer needed, Retail pack format

How to Order

Send the following and the first quotation will be the right one:

- The products you want, by name
- The quantity per item
- The market the goods are sold in, so the power option is correct
- The light colour you want across the range
- The date the goods have to be on the shelf
- Any packaging or branding requirement, with artwork if available
