Wearable Shoulder and Neck Massager With Handheld Massager Set

This is a two-piece consumer health massage set built to rehabilitation equipment production standards: a wearable shiatsu neck and shoulder unit plus an ergonomic handheld percussion massager. Both units run on a rechargeable DC 5V battery pack with a 110V-240V universal adapter, so one SKU ships to any export market without a

Key specifications

Set Contents: Wearable shiatsu neck and shoulder massager plus handheld percussion massager

Massage Heads: 5pcs interchangeable silicone heads including a spherical head for back and thigh

Input Voltage: DC 5V, universal adapter supporting 110V-240V

Working Time: Wearable 3-6h per full charge, handheld 4-7h continuous

Heating Temperature: Stable at 40-43C

Intensity Levels: 3 adjustable levels

Medical Fascia Gun for Rehabilitation and Physiotherapy

A portable deep muscle stimulator produced to Class II medical device production standards and used in hospital physiotherapy rooms. The pure copper brushless motor runs quietly through five variable-frequency speeds from 1800 to 3200 rpm at a 6mm amplitude, and four medical-grade silicone heads cover broad muscle groups, joints

Key specifications

Product Type: Deep muscle stimulator, rehabilitation therapy equipment

Production Standard: Class II medical device production specification

Speed Settings: 5-speed variable frequency, 1800-3200 rpm

Amplitude: 6mm

Motor: Pure copper brushless silent motor

Battery: 2000mAh lithium

Hot and Cold Compress Bag for Home Therapy

A reusable compress bag that covers both cold therapy and heat therapy in one non-medicinal home care product. Three formats are available: a traditional fabric bag filled with water, a gel pack that can be used in both a microwave and a refrigerator, and a heating bag filled with natural grains. The same product therefore cover

Key specifications

Product Type: Hot and cold compress bag

Category: Non-medicinal home physical therapy product

Format Options: Water-fill fabric bag, microwave and refrigerator gel pack, natural grain heating bag

Use: Cold therapy and heat therapy

sdmedicaldevices.com/products/hot-and-cold-compress-bag.html

Cooling Gel Patch for Fever and Headache Relief

An over-the-counter hydrogel cooling patch that draws heat away from the body and delivers an immediate cooling effect without leaving residue on the skin. The patch works without refrigeration, so it can be kept in a school first aid box, a travel bag or a bedside drawer and used the moment a fever or headache starts. Typical u

Key specifications

Product Type: Cooling gel patch, hydrogel cold compress

Classification: Over-the-counter

Cooling Method: Hydrogel heat absorption

Refrigeration: Not required

Typical Uses: Fever, headache, migraine, muscle fatigue, heatstroke symptoms

sdmedicaldevices.com/products/cold-compress-patch.html

Cold Therapy Device With Circulating Cold Water

A motorised cold therapy unit that circulates continuous iced water from a cooler through a specialised body wrap. Unlike an ice pack, which warms within minutes, the pump maintains a steady cold temperature across the whole treatment period, which is why these units are used after surgery and after sports injuries to reduce swe

Key specifications

Product Type: Cold therapy machine, cryotherapy unit

Operating Principle: Motorised circulation of iced water from a cooler through a wrap

Application: Post-surgical recovery and sports injury management

Therapy Aim: Reduce swelling, minimise inflammation, drug-free pain relief

sdmedicaldevices.com/products/12808.html

Non-Invasive RF Beauty Device for Skin Tightening

A non-invasive radiofrequency beauty device that uses electromagnetic waves to heat the deeper layers of the skin in a controlled way. The thermal energy stimulates new collagen and elastin production, which is the mechanism behind the tighter and firmer skin these devices are bought for. Because nothing penetrates the skin, the

Key specifications

Product Type: Non-invasive radiofrequency beauty device

Technology: Radiofrequency electromagnetic waves

Mechanism: Controlled heating of deeper skin layers to stimulate collagen and elastin

Application: Facial skin tightening and firming

sdmedicaldevices.com/products/rf-beauty-device-non-invasive.html

Home Hair Removal Device With IPL or Diode Laser

An at-home hair removal device using either intense pulsed light or diode laser technology to slow hair growth over a treatment course. Both technologies work by delivering light energy into the hair follicle, and devices in this category are judged on treatment speed and on skin sensing that matches the energy level to the user

Key specifications

Product Type: At-home hair removal device

Technology Options: Intense pulsed light or diode laser

Mechanism: Light energy delivered to the hair follicle to slow hair growth

Feature: Skin sensing

Application: Home use on face and body areas
