Hospital Furniture

Beds trolleys chairs and examination tables built for the cleaning routine and load a healthcare environment applies every day.

Stainless Steel IV Pole With Adjustable Height and Four Hooks

A mobile intravenous stand used in hospitals, clinics and home care to suspend IV bags and bottles. The stand is built from stainless steel or aluminium alloy so it withstands frequent cleaning and disinfection, with a support pole, a height adjustment mechanism and multiple hooks, typically four, so several bags can hang at once.

Key specifications

Product Type: IV stand, infusion pole

Main Material: Stainless steel or aluminium alloy

Height: Adjustable

Hooks: Multiple, typically four

Mobility: Castors fitted on mobile versions

Use Settings: Hospitals, clinics, home care

sdmedicaldevices.com/products/iv-pole.html

Infusion Row Chair With Stainless Steel IV Stand

An infusion row chair for hospital outpatient departments, clinics and infusion centres, built on a thickened steel frame treated with phosphating and electrostatic spraying so it is durable and easy to clean. Seat cushions use high-resilience foam under PU leather to stay comfortable through a long infusion, and each seat is separate.

Key specifications

Product Type: Infusion row chair, infusion bench with IV stand

Frame: Thickened steel, phosphating and electrostatic spraying

Cushion: High-resilience foam

Upholstery: PU leather

IV Pole: Stainless steel

Backrest: Adjustable for sitting or reclining

Stainless Steel Medical Trolley With Three Shelves

A three-shelf stainless steel medical trolley used to move instruments, dressings and supplies between a store room and a bedside. Each shelf has a raised guard rail so items do not slide off while the trolley is being pushed, and the frame runs on four castors with a side push handle. Stainless steel construction is what lets it last.

Key specifications

Product Type: Medical trolley, treatment cart

Shelves: Three

Material: Stainless steel

Shelf Edging: Raised guard rails

Mobility: Four castors

Handle: Side push handle

Folding Accompany Chair Bed for Hospital Wards

A folding accompany chair that opens from a ward chair into a flat bed, so a family member staying with a patient does not spend the night upright in a visitor chair. The steel frame is powder coated for cleaning, the seat, back and leg sections carry padded upholstered cushions, and armrests and castors are fitted so the unit c

Key specifications

Product Type: Folding accompany chair bed

Configurations: Upright chair and flat bed

Frame: Powder-coated steel

Cushions: Padded seat, back and leg sections

Features: Armrests, castors, folding frame

Use Area: Hospital wards and clinics

sdmedicaldevices.com/products/folding-chair.html

Electric Gynaecological Examination and Delivery Table

An electric gynaecological examination and delivery table with a column base that raises and lowers the whole table so a clinician can work at the right height rather than stooping. The backrest adjusts through the hand control, padded leg supports position the patient for examination, and a stainless steel drainage basin slides

Key specifications

Product Type: Gynaecological examination and delivery table

Height Adjustment: Electric, column base

Control: Hand control

Backrest: Adjustable

Leg Supports: Padded and adjustable

Drainage: Pull-out stainless steel basin
