The Problem This Family Solves

Palletised freight loses money at the loading bay. Rear-door loading creates a queue, sheeting an open deck costs labour at every stop, and torn curtains stop sealing after a few seasons.

Core Advantages

- Electric hydraulic wing panels that open both sides at once for forklift access
- Sealing strips between the vertical frames keep the compartment weatherproof
- Dry box bodies with 12600kg payload against a 3400kg tare
- Wingspan loading weight to 60000kg against a 7000kg tare
- Dimensions selectable freely at order

Heavy Loading Van Type Box Semi Truck Trailer China Factory for Sale

A van type box trailer body for dry cargo that has to stay out of the weather and out of sight. Maximum gross weight is 16000kg with a 12600kg maximum payload against a 3400kg tare, so a high proportion of the rating goes to cargo. External dimensions are 7.45m x 2.55m x 2.75m with an internal 7.4m x 2.5m x 2.7m, giving close to the full external envelope as usable space. It is the choice for palletised freight, packaged goods and anything that needs a lockable, sealed compartment rather than a sheeted open deck.

Type	Dry Container Length (feet): 40'
Capacity	40ft
External Dimensions	(l x W x H)(mm): 7.45m x 2.55m x 2.75m
Internal Dimensions	(l x W x H)(mm): 7.4m x 2.5m x 2.7m
Maximum Gross Weight	16,000 kg
Maximum Payload	12,600 kg
Tare Weight	(according weigh) 3,400 kg

Logistics Wingspan 3-Axle 30/40 Ton Semi-Trailer from China Factory

A wingspan trailer whose side panels lift on an electric hydraulic device so forklifts can load and unload from both sides at once. Overall dimension is 13750*2550*4000mm, freely selectable at order, with a 7000kg tare against a 60000kg loading weight. Suspension is mechanical, air or single point in German or American style, rims are 9.00-22.5 in 12 units, and the landing gear is a 28 tonne JOST, FUWA or other Chinese brand unit. Sealing strips between the vertical frames of the side panels keep the compartment weatherproof when closed.

Overall Dimension	(L*W*H) 13750*2550*4000mm (size can be chose freely)
Tare Weight	7000KG Loading Weight 60000KG
Suspension System	Mechanical
Suspension	air suspension / single point suspension (Germany
Type	or America
Rim	9.00-22.5 12Units
Spare Wheel Bracket	1 piece
Landing Gear	Standard 28Ton, JOST brand or FUWA brand or other china brand.
ABS	Optional upon choice

Other Truck Trailer Questions

Wingspan or Box Van

A wingspan opens the whole side for forklift access and still seals when closed. A box van is simpler and lighter but loads only through its doors.

Are Wing Panels Weatherproof

Yes. Sealing strips are fitted between the vertical frames of the side panels, so the compartment stays dry with the wings closed.

How Much Headroom Do the Wings Need

They swing upward, so check the clearance in your covered loading bays before ordering. We can confirm the opened height for your specified build.

Can the Box Body Be Insulated

Insulated and ventilated bodies are available on request. Tell us the cargo and we will confirm the build.

Can I Change the Dimensions

Yes. On the wingspan trailer the dimensions can be chosen freely at order, and the box body length, height and door arrangement are set to your pallet pattern.
