How To Order

Requirement Review

Tell us the country of use, road conditions, cargo type, load weight and any axle-load rules. We match a model and configuration rather than quoting the first trailer on the list.

Specification And Quotation

We confirm axle count and brand, suspension type, tire and rim size, deck height or tank volume, plate thickness, kingpin size and paint system, then quote FOB or CIF. This usually takes one to three days.

Drawing Approval

For a customized build you receive the design drawing. Nothing is cut until you have reviewed and signed it, and you can take part directly in the design decisions.

Production

Cutting, robotic and manual welding, assembly and fit-out at the Liangshan factory. Urgent orders go onto an expedited process without shortening the inspection steps.

Inspection And Testing

Weld inspection, tank pressure and leak testing where applicable, axle alignment, brake performance and road testing, with dimensions checked against the approved drawing.

Painting And Finishing

Complete chassis sandblasting followed by primer and top coat in your specified colour. Polyurethane finishes are available for hot and coastal climates.

Shipping

By container, bulk or roll-on roll-off according to the model. We handle export documentation and confirm which certificates your destination requires before the vehicle leaves.

After Sales

One year quality assurance, lifetime spare parts supply, technical support by phone or message, and engineers dispatched where a fault cannot be resolved remotely.

Frequently Asked Questions

Are You a Trailer Factory or a Trading Company

We are a trailer factory. Production is in Liangshan, Shandong, with more than 20 years of manufacturing experience, and the sales and export department is in Jinan.

How Do I Choose the Right Trailer

Tell us the country you will use it in, so we can match the trailer to your road conditions and operating conditions, along with the model, specific use and loading capacity you need. If you already have detailed requirements such as length, capacity, height and width, send those and we will quote against them.

How Are Trailers Shipped

Some models ship in sea containers; others must go by bulk or roll-on roll-off. We confirm the method with the quotation, since it affects the freight cost.

What Are Your Payment and Delivery Terms

We quote FOB, where the trailer is delivered to a Chinese port and you appoint the forwarder, or CIF, where we arrange the forwarder and insurance and deliver to your designated port. We work with many forwarders long term, which keeps the rate competitive.

What After Sales Service Do You Provide

One year quality assurance. If there is a quality problem we provide after-sales service and guarantee spare parts supply for the whole service life of the trailer. Where necessary we can arrange engineers to travel to your country for guidance.

How Long Does Delivery Take

Stock models can be dispatched in as little as 10 days. A customized build normally takes around 45 days from signed drawings, and urgent orders can go on an expedited production process.

Do You Accept Agency or Distributor Cooperation

Yes. We previously worked mainly on OEM for large enterprises and now have agents in many countries. We welcome more agents to join and develop with us.

Can You Customize the Trailer

Yes, extensively. Axle count and brand, load capacity, body or tank dimensions, deck height, plate thickness, suspension type, braking, lighting, tire size and paint system are all adjustable, and you approve the drawing before production.
