

Painted Writing Steel

Coil coated writing surface for magnetic whiteboards chalkboards and blackboards in white green and black with a plain or gridded face.

Painted writing steel is the surface layer of a magnetic writing board. The steel carries the magnet, the coating carries the writing performance. Senko supplies this material as a coil so board factories can cut, form and laminate it on their own line without changing the way they build boards.

Painted Whiteboard Steel

Green Chalkboard Steel

Black Chalkboard Steel

Specification Range For All Painted Writing Steel

Thickness	0.2mm to 0.6mm
Coil Width	600mm to 1500mm
Inner Diameter	508mm
