Vacuum Formed Trays (0 items)

Vacuum formed plastic trays with custom cavities for holding electronic components during handling, transport and storage,...

Vacuum formed trays are made to the device rather than sold from a catalogue, so there is no fixed item list. Send the package outline or a sample and a tray specification comes back with the quotation.

How to Ask for a Quotation

Send one of the following: a drawing of the tube, a drawing of the device that goes into it, or a sample tube. If none of those exists, send the physical component so the profile can be measured from it.
