

Conference Speakerphones

Omnidirectional speakerphones with 2, 4 and 6 microphone arrays for hybrid meetings

About This Category

USB and Bluetooth speakerphones with omnidirectional microphone arrays of two, four and six capsules, 360 degree pick-up from three to six metres, DSP noise reduction and echo cancellation, and 5 W or 10 W output. Battery versions carry 2000 mAh to 4000 mAh cells for up to twelve hours of use.

Who It Is For

- IT hardware distributors and unified communications resellers
- Office furniture and meeting room fit-out suppliers
- Corporate IT departments standardising huddle rooms
- Brands building a hybrid-work accessory line

How To Specify It

- Size the microphone array to the table, not the room: two capsules for a desk, six for a boardroom.
- Confirm whether the unit must run on battery or can stay bus-powered over USB.
- Check the platform certification your customer expects before final BOM.
- Ask for a pick-up test recording during sampling rather than relying on the datasheet.

Conference Speakerphones — 4 Models

All specifications below are the published figures for each model.

Portable Conference Speakerphone 2 Mic

Conference Speakerphones

Product size 140*125*37mm

- Portable Bluetooth Speakerphone for Remote Conference / Video Conference
- 2pcs omnidirectional microphones array. 360 degree voice pick-up. It's able to pick up voice of people standing about 3~5 meters away
- Advanced DSP process for noise reduction and echo elimination, makes voice clearer, more stable and balanced
- 5W output power
- Built in rechargeable 2,000mAh lithium battery
