

TWS Earbuds

True wireless earbuds with ENC, gaming low latency and battery display

About This Category

True wireless earbuds built for brands that need a recognisable shape, a case that survives a pocket and a Bluetooth platform that pairs first time. The range covers ultrathin cases at 16 mm, LED battery displays, ENC dual-microphone calling, 65 ms gaming mode, transparent shells, detachable luminous ear hooks and open-ear wear.

Who It Is For

- Consumer electronics brands adding an entry or mid tier earbud
- Mobile accessory distributors and retail chains
- Telecom and carrier accessory programmes
- Promotional and gift sourcing agencies

How To Specify It

- Confirm the wearing style first: in-ear, ear-hook or open-ear changes the whole tooling path.
- Decide whether the case needs a battery display; it changes the case PCB and lens.
- Specify whether ENC calling or gaming latency matters more for the target buyer.
- Send your logo artwork and case colour references so we can quote printing and tooling together.

TWS Earbuds — 16 Models
