

# Wall Lights Specification Sheet

IP54 rated aluminium LED wall lights in three lengths, 8 W to 24 W.

SB2167 is an IP54 wall light in 220 mm, 300 mm and 600 mm lengths, all 35 mm deep. The rating is the reason it exists: it can go on a bathroom mirror wall, a covered balcony or an entrance wall where a dry-room decorative fixture would fail within a year.

WALL LIGHTS

High Purity Aluminium Wall Light SB2167 IP54

IP54 aluminium wall light in three lengths, 8 W to 24 W, matt black matt white or gold

|                        |                                                                                      |

| Delivery Time          | Based on the mode of shipping chosen                                                 |

Notes

- IP54 rated across all three lengths
- 35 mm depth, so the fixture stays clear of a narrow corridor
- CREE LED with Done brand driver
- Matt black, matt white and gold as standard finishes

Colour temperature is built to order per line item and cannot be changed after delivery. Production time is 20 days or less. Delivery time depends on the shipping mode chosen. Every piece is packed singly and our packing is verified by drop test.
