

Installation and Site Checklist

What to confirm before a stone bathtub is delivered and what to do on site.

Print this sheet and work through it with your contractor. A stone tub cannot be lifted by hand and cannot be trimmed on site.

Minimum order	1 piece
Production time	15 to 30 days
Sea freight time	15 to 40 days subject to destination port
Payment	T/T, L/C, Credit or Debit Card, Paypal

Before you order

- Floor loading confirmed with a structural engineer for tub weight plus water plus bather
- Bathroom opening measured and the tub size agreed against it
- Drain and overflow position decided against the existing plumbing
- Interior and exterior finish chosen
- Stone approved from block photographs

Before the crate ships

- Crate weight and dimensions received from the factory
- Route measured from the street to the bathroom including doors corners lift size and lift capacity
- Lifting equipment arranged for the site
- Delivery date agreed against the fit out programme
- Customs documents confirmed with your broker

On delivery

- Photograph the crate before opening it
- Move the crate with a forklift or trolley rather than opening it early
- Unpack in a protected area with the film left on until the tub is in position
- Check dimensions and finish against the approved photographs

Installation

- Level base prepared. Stone will not flex to hide an uneven floor
- Waste connection brought to the carved drain position
- Fall to the waste checked before the tub is set down for the last time
- Tap and overflow fitted and tested

Protection and handover

- Stone sealed according to the material
- Tub boarded and filmed until the rest of the fit out is complete
- Cement grout and acidic cleaners kept off the surface
- Maintenance sheet handed to the owner or the housekeeping team

Questions during installation

WhatsApp Zoey at 0086-181-6093-8286 or email sales@ricoglobal.com.my. Send photographs of the situation and you will get an answer from the workshop.
