Address	R1925, Peak Summit, No.885 Xiahe Rd., Xiamen, China 361001

Trade terms

Payment: L/C or T/T. Packing: seaworthy professional wooden crate. Dimension: all standard dimensions available. Delivery time depends on quantity. Products can be customized at request.

Order stages

Enquiry - risk: A list of names with no clarity on what is actually in stock. Our check: We answer against current blocks and bundles rather than against a catalogue.

Selection - risk: Photographs that flatter the material. Our check: Bundle photographs taken before crating, on the actual material reserved for you.

Cutting - risk: Thickness lost in polishing. Our check: Thickness agreed before sawing and checked after polishing.

Grading - risk: Cracks found after arrival. Our check: Slab-by-slab review, with rejected slabs replaced before packing.

Packing - risk: Crates that fail on a long sea passage. Our check: Seaworthy professional wooden crates built for the bundle weight.

Loading - risk: Containers loaded without a plan. Our check: Loading arranged so bundles can be unloaded in the order you need them.

Before you place an order

- Send material names, sizes, quantity and destination port in one message
- Confirm finished thickness after polishing, not before
- Ask for photographs of the actual bundles before crating
- Agree crate marking against your unloading sequence
