Suspension Globe

sz-sculpture.com/products/suspension-globe.html

How to Order

Send what you have

A drawing, a rendering, a sketch or a reference photograph is enough to start. Technicians calculate the plate forming data for each panel, so the finished shape follows your drawing rather than a catalogue size.

Tell us the finish

Mirror polish, brushed satin, colour electroplating and baked lacquer are all produced in house. Colour is approved from a physical sample before production.

Large work is sectioned

Large pieces are built as a scale model first, produced in sections, trial assembled in the workshop and marked in assembly order before crating.

Packing and shipping

Polished faces are covered with protective film and the pieces are crated. Send the destination port so the crating arrangement can be confirmed.

Designer work stays private

Designer copyright is respected. Work commissioned by a designer is never published on our site or in this catalogue.
