Tube Profiles

Custom tailored special shape tube profiles for many different needs, including D section, triangle shape, oval shape, hexagonal tube and other cross sections. Send CAD drawings with detailed requirements and we handle the full job and deliver on schedule.

Why this category exists

A round tube welded into a square pocket needs a machined adapter. A tube drawn to the finished section removes that adapter and the weld with it.

Core strengths

- D section, triangle, oval, hexagonal and drawing-defined cross sections
- Stainless and carbon steel tubing shapes from the same supplier
- Drawing in, finished tube out, delivered on the agreed date

Products

Custom Shape Steel Tube Profiles — D section triangle oval and hexagonal tube in stainless and carbon steel

Shapes	D section, triangle shape, oval shape, hexagonal and other drawing defined sections
Materials	stainless steel and carbon steel
Drawing formats	CAD drawings with detailed requirements
Delivery	finished tube profiles delivered on the agreed date

Carbon Steel Tube Profiles — Carbon steel tube profiles including C45 sections for machinery duty

Typical grade	C45
Materials	carbon steel
Shapes	D section, triangle, oval, hexagonal and drawing defined
Delivery	cut to the length specified on the order
