

PRODUCT FAMILY DATASHEET

Billiard Balls

Ball sets and individual cue balls in American, snooker and Russian sizes, published with the diameter and the resin grade the listing states.

What This Family Is For

The ball is the only piece of equipment every player on the table touches, and the wrong diameter makes a table unplayable rather than merely disappointing. This family separates the sizes properly: 57.2 mm American, British snooker sizes, and the 60.3 mm and 61 mm Russian pyramid balls, with cue balls published individually as well as in sets.

Products In This Family

Product	Group	Summary
Large 60.3mm Russian billiard balls (Russian style) with 16 white balls, suitable for export to cross-border e-commerce.	Billiard ball	44.5, 47.5, 50.8, 52.5, 57 and 60.3 mm diameter, grade 12A as published, for Russian pyramid tables.

Colours referenced	White
Availability	Confirmed per order
OEM and private label	Accepted: logo on case and customised packing
Weight	Not published on the source listing
Length	Confirmed per order
Minimum order quantity	100 pieces, as stated on the source listing
Lead time	Not published on the source listing

Figures are reproduced from the manufacturer's published listings and may be revised. Rows reading 'not published' are figures the source listing does not publish; they are confirmed in writing rather than estimated. Confirm the current revision with your quotation.

Why Buyers Choose This Range

- Diameters published in millimetres and in inches where the listing gives both
- Grade codes such as 8A, 12A and 3A reproduced from the source listing
- Individual cue balls sold separately from sets
- Phenolic resin and crystal resin listings kept distinct
- Bulk export packing for cue balls by the carton

Problems It Solves

- A 57.2 mm set is bought for a table cut for Russian pyramid balls
- Cue balls are sold without a diameter, so they do not match the set
- Resin grade is described as premium with no grade code attached
- A club loses the cue ball and cannot buy a single matching replacement
- Ball sets are photographed under coloured light and arrive off-shade

Who It Is For

- Pool halls and clubs replacing sets and lost cue balls
- Distributors serving markets with different table standards
- Tournament organisers specifying a grade for competition
- Hotels and entertainment venues fitting out tables
- Exporters shipping to Russian pyramid and snooker markets

Application Scenarios

- Replacing a scuffed set on a busy commercial table
- Stocking a single spare cue ball per table
- Fitting out Russian pyramid tables for export markets
- Tournament tables needing a consistent grade across rooms
- Retail sets sold with a printed diameter on the box

Materials

- The source listing names no material for this item, so none is claimed here
- Material substitutions are raised before production rather than after arrival
- Where a material matters to your market, confirm it in writing with the order

Manufacturing Process

1. Resin batch prepared to the listed material
2. Balls cast and cured
3. Ground and polished to the published diameter
4. Colour and marking applied to the set pattern
5. Inspected for surface and finish
6. Boxed as a set or as an individual ball

Customisation Options

- Logo printed on the case and the packing, per the source FAQ
- Packing customised to retail, counter or bulk supply
- Colour options where the product publishes them
- Sample produced and approved before the production run
- Low minimum order quantity, with sample orders accepted

Certification Standards

Production follows . Certificates are sent per product on request.

Questions Buyers Ask

Which ball size do I need?

It depends on the table and the game. American pool tables take 57.2 mm (2-1/4 inch) balls, British snooker uses smaller balls, and Russian pyramid uses 60.3 mm or larger. Each product page publishes the diameter its own listing states.

What do the grades like 8A and 12A mean?

They are the grade codes used on the source listings to separate quality tiers within the range. They are reproduced here exactly as published; no hardness or roundness tolerance is claimed beyond what the listing states.

Can I buy a single cue ball?

Yes. Individual cue balls are published as their own products, including red-dot and six-dot training balls, because the cue ball is the piece a room loses first.

Is the resin phenolic or polyester?

Where the listing names phenolic resin, the product page says phenolic. Where it does not, the page does not claim it. That distinction matters for durability, so it is not blurred here.
