

PRODUCT FAMILY DATASHEET

Billiards Chalk

Oil-based and dry cue chalk in 8A, 18A and 22A grades, boxed from single pieces to 100-piece sets, with custom colours and shapes for private label.

What This Family Is For

Chalk is the cheapest thing on the table and the first thing a player blames for a miscue. This is the widest family on the site because pool halls buy it by the hundred and brand owners print it: square, round, hexagonal, butterfly and cross-pattern chalk, oily and dry, in the grade codes and box quantities the source listings publish.

Products In This Family

Product	Group	Summary

Minimum order quantity	Low MOQ, sample orders accepted; unit figure confirmed per order
Lead time	Not published on the source listing

Figures are reproduced from the manufacturer's published listings and may be revised. Rows reading 'not published' are figures the source listing does not publish; they are confirmed in writing rather than estimated. Confirm the current revision with your quotation.

Why Buyers Choose This Range

- Grade codes 8A, 18A, 22A and S10 reproduced from the source listing
- Box quantities published per product, from single pieces to 100-piece sets
- Oil-based and dry types kept separate rather than pooled
- Custom colours and shapes accepted for private label
- Individually wrapped retail packs available alongside bulk boxes

Problems It Solves

- Chalk skids off the tip instead of holding, so miscues rise across a room
- A club buys single pieces when it needs a hundred-piece box
- Oily and dry chalk are sold interchangeably with no grade stated
- Branded chalk arrives in a colour that does not match the brand
- Boxed chalk crumbles in transit because it was packed loose

Who It Is For

- Pool halls and clubs buying consumables by the box
- Brand owners printing their own chalk and packaging
- Distributors stocking several grades for different price points
- E-commerce sellers needing individually packed retail pieces
- Tournament organisers supplying chalk to every table

Application Scenarios

- Every table in a commercial room chalked from a bulk box
- Retail single packs on a pro shop counter
- Branded chalk given away at a tournament
- Export cartons mixing several colours and grades
- Chalk packed with a matching holder as a retail bundle

Materials

- The source listing names no material for this item, so none is claimed here
- Material substitutions are raised before production rather than after arrival
- Where a material matters to your market, confirm it in writing with the order

Manufacturing Process

1. Abrasive compound mixed to the grade being produced
2. Pressed into the shape the product publishes
3. Cured and colour-checked against the approved sample
4. Wrapped individually where the product is sold that way
5. Boxed to the published box quantity
6. Cartoned for retail, counter or bulk supply

Customisation Options

- Logo printed on the case and the packing, per the source FAQ
- Packing customised to retail, counter or bulk supply
- Colour options where the product publishes them
- Sample produced and approved before the production run
- Low minimum order quantity, with sample orders accepted

Certification Standards

Production follows . Certificates are sent per product on request.

Questions Buyers Ask

What is the difference between oily and dry chalk?

Oil-based chalk is denser and leaves a heavier deposit that holds through more shots; dry chalk deposits a lighter, more abrasive layer. Rooms with humid air often prefer one over the other, and both types are published here separately.

What do 8A, 18A and 22A refer to?

They are the grade codes used on the source listings to separate the chalk tiers. Each product page reproduces the code its own listing carries rather than converting them into a claim about performance.

Can chalk be made in our colours?

Yes. The range includes custom chalk in various colours and shapes for snooker and billiard cues, and OEM printing on the box is accepted.

How is chalk packed for export?

By the box quantity published on the product, from single individually wrapped pieces up to 100-piece sets. Carton quantities for a full shipment are confirmed by email.
