

PRODUCT FAMILY DATASHEET

Cue Cases And Chalk Holders

Cue cases with through-cue slots, and magnetic, acrylic and moisture-proof chalk holders that keep chalk usable and cues straight.

What This Family Is For

Two things ruin equipment between sessions: a cue transported loose and chalk left to absorb moisture. This family covers both, from double-slot cue cases built for through-cue snooker sticks to magnetic clip-on chalk holders and sealed acrylic chalk boxes.

Products In This Family

Product	Group	Summary
New billiard cue case with double slots, integrated through-cudgel, snooker cue with large head, 3/4 split design, plastic steel case, high-value appearance.	Case and holder	Plastic.

Published Specification

Property	Value
Product family	Case and holder
Joint format	3/4 jointed, One-piece
Material	Plastic
Game or table style	Snooker
Availability	Confirmed per order
OEM and private label	Accepted across the range, confirmed per item
Weight	Not published on the source listing
Length	Confirmed per order
Minimum order quantity	Low MOQ, sample orders accepted; unit figure confirmed per order
Lead time	Not published on the source listing

Figures are reproduced from the manufacturer's published listings and may be revised. Rows reading 'not published' are figures the source listing does not publish; they are confirmed in writing rather than estimated. Confirm the current revision with your quotation.

Why Buyers Choose This Range

- Case formats published, including double-slot and through-cue types
- Holder materials named: plastic, acrylic and magnetic clip types
- Moisture-proof sealed boxes published separately from open holders
- Sized for the chalk shapes in this factory's own chalk range
- Logo printing on cases accepted as standard OEM work

Problems It Solves

- A cue warps because it travelled loose in a car boot
- Chalk absorbs moisture in a humid room and stops holding
- A case is bought that does not fit a through-cue snooker stick
- Players lose chalk between tables because there is nothing to clip it to
- Loose chalk marks the felt and the cue case lining

Who It Is For

- Players transporting a private cue
- Pool halls issuing chalk holders at each table
- Retailers selling cases as the natural upsell to a cue
- Distributors packing cases with cue orders
- Brand owners printing logos on cases and holders

Application Scenarios

- A member cue stored and carried in a hard case
- One magnetic chalk holder clipped at every table
- Humid climates where open chalk degrades fastest
- Retail bundles pairing chalk with its holder
- Branded cases handed out at club level

Materials

- Named on the source listing: Plastic
- Material substitutions are raised before production rather than after arrival
- Where a material matters to your market, confirm it in writing with the order

Manufacturing Process

1. Material selected to the published type
2. Body formed or moulded
3. Clips, magnets or seals fitted where the model carries them
4. Lining and fitment checked against the item it holds
5. Printed with logo artwork where ordered
6. Inspected and packed

Customisation Options

- Logo printed on the case and the packing, per the source FAQ
- Packing customised to retail, counter or bulk supply
- Colour options where the product publishes them
- Sample produced and approved before the production run
- Low minimum order quantity, with sample orders accepted

Certification Standards

Production follows . Certificates are sent per product on request.

Questions Buyers Ask

Will a case fit a through-cue snooker stick?

The double-slot cases in this family are published specifically for through-cue and large-head snooker cues. The joint format your cue uses is what decides it, so confirm that by email before ordering.

Why does chalk need a sealed box?

Chalk is a compressed abrasive that takes up moisture from the air. Once it does, it deposits unevenly and the tip slips. A moisture-proof box is the cheapest way to keep a box of chalk usable through a humid season.

Do the holders fit any chalk?

They are sized for the square and round chalk shapes published in this factory's chalk range. Fit against another supplier's chalk is not claimed.

Can cases be printed with our logo?

Yes. The source FAQ names logo printing on cases as standard OEM work, alongside customised packing.
