

UPLUMIN LIGHTING

Garland Light Colour Chart

The factory colour chart photographed lit. Colour names are ours; match against a physical sample rather than a printed reproduction, because print cannot show emitted light accurately.

How to use this chart

- Printed pages cannot reproduce emitted light. Use this to shortlist, then ask for a lit sample.
- Warm white and white read very differently against stone and against glass — check on the actual surface.
- Cable colour matters as much as bulb colour. Clear, white, green, dark green, blue, pink, black, yellow and purple are all available.
- Multi colour and RGB are separate options; RGB needs a controller, multi colour does not.

Available bulb colours

String, net, icicle and curtain light	Red, green, yellow, blue, white, warm white, pink, purple, multi colour, RGB
Meteor shower light	Warm white, white, red, green, blue, golden, yellow, multi colour, RGB
Rope light	Red, blue, yellow, white and others
Dandelion and landscape light	White, warm white, red, green, blue, yellow, purple, RGB
Cable colours	Clear, white, green, dark green, blue, pink, black, yellow, purple
