Sample Time	3 to 7 days
Production Time	7 to 15 days
Packing	50 yards for one roll 30 rolls for one carton or by your request
Minimum Order	1000 metres

Ranges

Polyester Webbing (27)

Dimensionally stable polyester tape for straps that must hold their shape, their colour and their rated load outdoors.

Polypropylene Webbing (28)

The lightest webbing in common use, dope dyed for colour that cannot wash out and priced for high volume assembly.

Jacquard Webbing (26)

Your logo woven into the strap itself on computer jacquard looms, so the branding cannot peel, crack or wash off.

Cotton Webbing (10)

Ring spun cotton tape with a soft matt face, specified by yarn count so the hand you approve is the hand you receive.

Elastic Webbing (11)

Woven elastic tape that recovers to its original length, specified by stretch percentage rather than by feel.

Cord and String (9)

Round and flat cord for drawstrings, handles and hang tags, matched to the webbing on the same product.

Silk Printed Webbing (3)

Screen printed words and patterns applied after weaving, the economical route to branded tape when a jacquard plate cannot be justified.

Book Head and Tail Bands (37)

Bookbinding headbands and endbands that finish the head and tail of a hardcover block, in cotton, linen and polyester.
