Who This Category Is For

Aftermarket part programmes, truck and bus fleet workshops, wholesalers building a vehicle-specific catalogue.

The Problem It Solves

Aftermarket buyers work from an OEM number, not a bearing designation, so they need a supplier that can move between the two.

Core Technical Advantage

Vehicle bearings are supplied against the vehicle part number as well as the bearing designation, so an existing part on the shelf can be matched directly.

Typical Applications

- Passenger car and light truck wheel ends
- Heavy truck and trailer hubs
- Clutch and transmission assemblies
- Belt drive tensioners and idlers
- Air conditioning compressors and alternators
