Who This Category Is For

Vehicle part importers who want bearings and adjacent driveline items on one order.

The Problem It Solves

Splitting a small order across a bearing factory, a clutch factory and a chain factory multiplies freight cost and paperwork.

Core Technical Advantage

Beyond bearings the group also manufactures industry chain, sprocket and related transmission parts, so these items ship on the same document set.

Typical Applications

- Clutch systems and release assemblies
- Cooling and water pump assemblies
- Starting and charging components
- Timing and transmission drives
- Stainless steel chain and sprocket drives
