Who This Category Is For

Rolling mill work-roll shops, axle and gearbox builders, truck and trailer part distributors, agricultural machinery makers.

The Problem It Solves

Four row work-roll assemblies and inch-series double row units are long-lead items that many suppliers will only quote as complete new mill spares packages.

Core Technical Advantage

The tapered raceway geometry lets one bearing take combined radial and axial load at low to moderate speeds, which is why four row units are used almost exclusively in work roll applications such as rolling mills.

Typical Applications

- Rolling mill work rolls and back-up rolls
- Automobile front wheel, back wheel and speed changer
- Rail vehicle axle boxes
- Gearboxes, reducers and pinion shafts
- Vibrating screens and printing machinery
