

PRODUCT OVERVIEW

Yuyuan Sweet Corn — Full Range

Shandong Yuyuan Agricultural Technology Co., Ltd. · Shandong, China · info@sdqsc.com · WhatsApp +86 137 8080 4185

Every product on this page starts from the same Pearl White fruit corn, grown on our own farmland and handled to keep its sweetness and snap all the way to your line. What changes between them is the cold chain they need and the channel they fit — not the corn.

Company

Company	Shandong Yuyuan Agricultural Technology Co., Ltd.
Location	Shandong, China — shipping worldwide
Growing base	More than 10,000 mu of company farmland
Flagship variety	Pearl White (Shengtian Baizhu) white super-sweet fruit corn
Formats	Fresh on the cob · IQF quick-frozen · vacuum-pack ambient
Languages	English · Chinese (Mandarin)
Contact	info@sdqsc.com · WhatsApp +86 137 8080 4185

Fresh Sweet Corn

Fresh sweet corn is the least forgiving format in the category. Sugar starts converting the moment the ear leaves the stalk, so everything depends on how short the gap is between the field and the cold room. Because Yuyuan grows the crop on its own land, that gap is a decision we make — not one we inherit from a collection network.

Pearl White Super-Sweet Fruit Corn	Shengtian Baizhu · flagship variety — Most sweet corn is bred to be cooked.
------------------------------------	---

Fresh Sweet Corn Cobs	Graded and pre-cooled in season — A fresh cob is judged in the hand, not on paper.
------------------------------	--

IQF Quick-Frozen Corn

Most complaints about frozen sweet corn are complaints about slow freezing: kernels that thaw limp, bleed water into a sauce, and taste flat. That is a physics problem, not a variety problem — and it is solved at the freezer, not on the spec sheet.

IQF Whole Kernel Sweet Corn	Free-flowing, individually frozen — Kernels are the format that gets used, not admired.
IQF Sweet Corn Cob Sections	Round-cut, portion sized — Corn on the cob sells because it looks like corn on the cob.
IQF Mini Sweet Corn Cobs	Short cuts for retail and food service — The mini-cob exists for a specific commercial reason: it puts recognisable corn on the cob into a pack size and a price point that a full ear cannot reach.

Vacuum-Pack Sweet Corn

Frozen supply assumes your customer has freezer space. A great many of them do not — convenience retail, ambient grocery aisles, hotel and catering stores, e-commerce fulfilment centres that ship at room temperature. That constraint is what this category exists to solve.

Vacuum-Packed Sweet Corn Cobs	Cooked, sealed, ambient — This is the format that reaches shoppers frozen corn never meets: the convenience store with no freezer, the ambient e-commerce carton, the hotel store cupboard, the lunchbox bought on the way to work.
--------------------------------------	---

How to enquire

Send the destination market, the format you need, estimated volume and frequency, packing and labelling requirements, and any certificates your market requires. We reply with samples, lead times and a quote — usually within one business day. There is no enquiry form: reach us on WhatsApp +86 137 8080 4185 or by email at info@sdqsc.com.

Figures describe typical performance of the Shengtian Baizhu variety and may vary with season and growing conditions. MOQ, pack sizes, carton weights and labelling are set to buyer specification. Certificates and documentation are confirmed per order and destination market before shipment.
